

FLOOD DEFENCE PUMPS AVAILABLE FOR SALE Low Hours On Pumps!

M&E Partners LLC and DMC Ltd are pleased to present for sale an inventory of specialist, static high-volume low pressure flood control pumps c/w gear boxes which are in the process of being removed from their original temporary installation location in New Orleans. The inventory of equipment comprises 8x Patterson pumps of 300CFS (8495 ltr/sec) capacity each, c/w Philadelphia Gear right-angle gear units and 11x Fairbanks Morse pumps of 366CFS (10,364 ltr/sec) capacity each, c/w Philadelphia Gear units located across two locations in New Orleans. The pumps were originally driven by Caterpillar 3512C engines of 1475HP at 1200 RPM,

however the drivers are not included in the sale. An additional inventory of Hydraflo hydraulic pumps is available and consists of 40x 60" hydraulic pumps and 14x 42" hydraulic pumps, originally located at both temporary pumping stations. **These pumps were designed for temporary installation to provide emergency flood defence based on a 100-year storm criteria and as such have had very little use, averaging less than 100-hours run time.**

Patterson Pumps at London Av. Canal pumping station. Patterson pump with gear and driver. NB Engine not included in sale. Decommissioning of the pump station, which is scheduled for approx. the end of Mar. '19.

Fairbanks Morse Pumps at 17th Street Canal pumping station.

A large number of **Hydraflo Hydraulic Pumps** are included in the inventory of assets being developed for sale. These are currently located at the same sites as the above mentioned Patterson and Fairbanks Morse pumps, but will be made available for sale from the storage location (TBC) as they are decommissioned. 40 x 60" hydraulic pumps & 14 x 42" hydraulic pumps.

Original manufacturers (MWI-Hydraflo, Patterson, Fairbanks Morse, and Philadelphia Gear) will have availability of the relevant technical manuals, planned maintenance documentation/schedules, and spare parts for this equipment as available. Recertification services can be provided.
